

# Package ‘minfiData’

October 8, 2016

**Version** 0.14.0

**Title** Example data for the Illumina Methylation 450k array

**Description** Data from 6 samples across 2 groups from 450k methylation arrays

**Author** Kasper Daniel Hansen, Martin Aryee, Winston Timp

**Maintainer** Kasper Daniel Hansen <khansen@jhsp.h.edu>

**License** Artistic-2.0

**Depends** R (>= 2.13.0), minfi, IlluminaHumanMethylation450kmanifest,  
IlluminaHumanMethylation450kanno.ilmn12.hg19

**LazyData** yes

**biocViews** Homo\_sapiens\_Data, MethylationArrayData

**NeedsCompilation** no

---

### Description

This contains the raw data for 6 samples from Illumina’s Human Methylation 450k dataset. The data has been preprocessed.

### Usage

```
data(MsetEx)
```

**Format**

An object of class "MethylSet"

**Details**

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files. The data has been preprocessed using `preprocessRaw`.

**See Also**

[MethylSet](#) for the class definition, [preprocessRaw](#) for the preprocessing function, [RGsetEx](#) for the companion raw data.

**Examples**

```
data(MsetEx)
pData(MsetEx)
```

---

RGsetEx

*An example dataset for Illumina's Human Methylation 450k dataset.*

---

**Description**

This contains the raw data for 6 samples from Illumina's Human Methylation 450k dataset.

**Usage**

```
data(RGsetEx)
```

**Format**

An object of class "RGChannelSet"

**Details**

Currently, the pheno data for these 6 samples are masked. Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files.

**See Also**

[RGChannelSet](#) for the class definition, [MsetEx](#) for the companion preprocessed data.

**Examples**

```
data(RGsetEx)
pData(RGsetEx)
```
