

Package ‘serumStimulation’

July 15, 2025

Version 1.44.0

Date 2011-08-09

Title serumStimulation is a data package which is used by examples in
package pcaGoPromoter

Author Morten Hansen <mhansen@sund.ku.dk>

Maintainer Morten Hansen, <mhansen@sund.ku.dk>

Description Contains 13 micro array data results from a serum stimulation experiment

biocViews ExperimentData, MicroarrayData

`serumStimulation` *Data set from serum stimulation DNA micro array*

Description

The `serumStimulation` data set is from an DNA micro array analysis of 13 samples from a serum stimulation experiment. There are 5 controls, 5 serum stimulated with inhibitor and 3 serum stimulation without inhibitor.

The original .CEL files have been read with `ReadAffy` and normalized with `rma`.

The data is the output of `exprs(rma(ReadAffy()))`

Usage

`serumStimulation`

Format

See `exprs` for description of output.
